

# Photo Fridge Magnets

Materials:

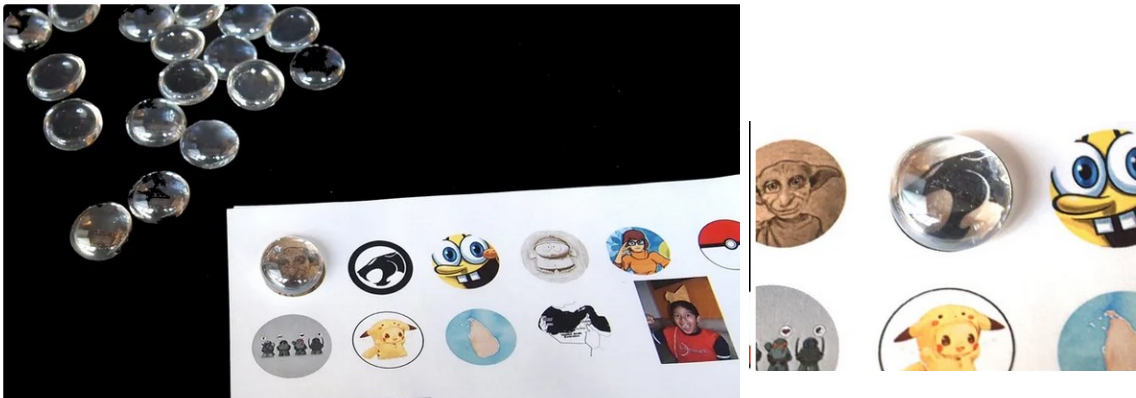

- Glass pebbles
- Mod-Podge
- Magnets

(Not included)

- Scissors
- Small Pictures (some samples are included but you can use any picture you want or have at home)

Step 1:

Gather your pictures or images. It should be a circular shape about the same size as your clear glass pebble.

Step 2:

Apply Mod-Podge to the back of your pebble. Or you can apply it to your image directly.

(No sniffing)

Step 3:

Apply Glass Pebble directly over the image. Push down hard to push away excess glue.

Pretty soon, the glue will dry up and you will see your image through the glass.

Let It **dry completely**..

Step 4:

Cut out your image around the pebble. Try and be as close as possible to the edge.

**Watch those Fingers!**

Step 5:

Stick your pebble and picture to the magnet. Attach them to your fridge and you're all done!
